Frozen is the new Fresh!

Our Story

The Idea is quite simple.

Whenever we take something from Nature, we give something back to Nature But this is just an idea! To transform this idea in to reality we need to do much more!

We at NTM & Vegcrop preserve nature's gift of natural resources like water, raw material & energy in sustainable way in products & processes.

Our 'Green Ambition'

We are passionate about People, our Planet and our Products, and we are inspired to maintain all three elements in an optimal state of balance...

NTM Vegiorganic Products are proactive in exploring and introducing more sustainable agricultural production methods. We have translated our ambitions into our Minimum Impact, Maximum Output, Sustainable Agriculture Practices.

We are committed to the frozen vegetable industry and we do our utmost to make a strong contribution to the sector. We are confident that the sector's outlook is bright as a provider of nutritious, affordable products, which will help to assure food security and reduce food waste. We are determined to play a leading role in sustainability, recognising that we need to confront tomorrow's issues today.

People

We are aware that everything we create is performed by people and for people, and we believe that our company has a broad social responsibility, with priority to our employees, but also to our surrounding community and society as a whole.

Planet

We are working hard to develop truly sustainable ways of growing our crops, by taking a holistic approach that considers the crop's needs, the activities of our farmers and the demands of our customers.

Product

NTM Vegiorganic Products develops products that are healthy, tasty, natural, convenient & nutritional and that take into account the market needs of our Retail & Food Service customers

We produce and deep-freeze an extensive range of Organic, Conventional vegetables & Snacks as per Global Standards for retail & foodservice industry.

IQF SYSTEM

The IQF deep-freezing system guarantees and maintains all the nutritional properties of the products, as well as their colour, smell, flavour and texture. We obtain a product with maximum quality guaranteed, which is convenient, adapted to the customer needs & available all year long.

OUR PROCESS

1. CULTIVATION : We select the best growing areas and the most suitable variety of seeds for each type of crop. We follow contract farming method, in which we provide seeds & inputs to farmers with technical knowhow & buyback guarantee.

2. HARVEST : We pick the products when they are at their best.

3. CLEANING : At factory level we carry out full grading & sorting to ensure only good products are processed further.

4. DEEP-FREEZING (IQF) : We freeze the products individually at very low temperature (-40 °C) and at high speed. In this way, all their organoleptic properties remain intact.

5. MIXING (IN CASE OF MIX VEGETABLES) : All individually quick-frozen ingredients are mixed to the agreed specification percentages.

6. PACKAGING : Both mixes and individual products are packed after grading and sorting. Every product is labelled as per standards. We guarantee the best quality and Food Security.

7. STORAGE : We keep the product at a controlled temperature of -18 °C in cold storage.

8. DISTRIBUTION : We transport the deep-frozen product to the various distribution centres & Port guaranteeing the cold chain is maintained along with Food Safety throughout.

Our Story

VegCrop Argo Products Private Limited incorporated in year 2023.

We are dedicated to create high quality Ready to Cook & Ready to Eat Products that makes your meal better and comfortable

We are also pioneers in the contract farming driven supply chain space for IQF vegetables.

RTE

We have wide range of ethnic foods, which are suited to, and serve, a vast number of geographies.

Everything at VegCrop family does revolves around food – how best to make it, how to source the beat ingredients, how to get the flavours just right – and then, how to get it into the kitchens of people like you, who love food just as much as we do.

Our Product range includes

1. Frozen Indian Breads
2. Frozen Indian Snacks
3. Frozen Indian Curries
4. Frozen Indian Ready Meals
5. Frozen French Fries
6. IQF Fruits & Vegetables

Our Factory

Frozen is the new Fresh!

A WAY TO ORGANIC & NATURALLY GROWN VEGETABLES

The good news is that frozen vegetables have plenty of nutritional value. The choice between fresh and frozen requires you to weigh, price and convenience as well as nutrient value.

"Frozen is a great, healthy alternative to fresh, especially if your fresh produce isn't so fresh anymore."
